

Colby Ludwig

Front-end web developer, UI designer.

Edmonton, AB

I'm a web developer passionate about creating responsive, intuitive, and impactful user experiences. I've worked with the web since 2010, and have built everything from small static marketing sites to major features for an internationally-used education platform. I'm passionate about making technology accessible and easy to use for everyone.

Experience

Front-end Web Developer

Showbie, Inc.

Edmonton, AB

Feb 2015 - Mar 2017

I worked with the web team at Showbie to bring their full-featured web app to life. Working with Ember.js, I've helped build the app from the ground up, contributing to a wide variety of areas and features including document annotation tools, localization infrastructure, and responsive UI and animations.

Front-end Web Development Intern

Lift Interactive

Edmonton, AB

Aug 2013 - Mar 2014

I worked with Lift on a variety of web-based projects, both client-facing and internal, including front-end web development for Django-based applications, CMS-backed client marketing sites, and static Jekyll-based sites.

Web Development and UI Design

Freelance

Jan 2012 - Feb 2016

Over the course of four years, I took on projects ranging from front-end development to full-service branding. Projects included everything from basic marketing and portfolio sites for independent clients to full product UI design for early-stage startups.
